

# If Your Mouthwash is Missing Fluoride, You're Missing Out

With fluoride mouthwashes like ACT<sup>®</sup>,  
you can freshen your breath and help prevent cavities, too.

## Fluoride makes mouthwash more than just a breath freshener

By switching to a fluoride mouthwash, you can do more with every swish and finish your oral care routine strong. You can freshen breath, strengthen enamel and help prevent cavities — all at the same time.

Another reason to switch: rinsing with water after you brush can rinse away the fluoride from your toothpaste that your teeth need. That's why you should finish strong by rinsing with a fluoride mouthwash.

## ACT<sup>®</sup> is the #1 Dentist & Hygienist Recommended Fluoride Mouthwash Brand<sup>†</sup>

Count on the Triple Action Power of ACT<sup>®</sup> Anticavity Fluoride Mouthwashes to:

- **Strengthen:** Up to 4x stronger teeth<sup>1</sup>
- **Protect:** Helps prevent acid erosion that leads to tooth decay
- **Freshen:** Provides fresh breath and comes in flavors kids and adults love
